

COLLISION EDGE™

INNOVATIVE REPAIR SOLUTIONS

The Blend Stick™

The Blend Stick™ is designed to guide estimators and Insurers through the process of properly assigning blend times to collision repairs.

The stick has calculations to aide estimators in properly sizing the final repair area and determining if there is sufficient room left to blend within the damaged panel.

The Estimating Kit

The Estimating Stick™ is designed to assist in photo locating emblems/decals to speed production and return the vehicle to its exact pre-accident condition

The Dent Sizer™ is designed to give scale to photos to accurately represent subjective damage.

Includes ALL Tools
